

Pioner Multi

Taking safety, durability and versatility to a new level

Key Points

- Enormous carrying capacity
- Superb sea keeping abilities
- Unique bow door

Huge reserves of buoyancy make the Pioner Multi an ideal utility boat. Which means that you can take advantage of good handling characteristics and a large carrying capacity in the same craft.

Thanks to a soft entry bow and two full length longitudinal keels, the Pioner Multi has superb sea keeping abilities and handling that would challenge most sports boats. Yet it still gives you a carrying capacity of 1,170kg.

The unique bow entry system can be easily lowered by winch and can be locked at any height for loading. The door is wide enough to permit most wheelchairs, which makes loading heavy or bulky items effortless.

These features make the Pioner Multi the popular choice for a wide range of activities. For example in recreational pursuits as a safety boat for sailing clubs, outdoor centres and scout groups. Or as a highly effective, safe and reliable workboat used by harbour authorities, Highland estates and construction sites.

It is also used as a dive boat for Police diving units, Fire Brigades and sports divers.

Standard Features
